How To Grade A Turnitin Assignment

1. In the Control Panel, choose Course Tools > Turnitin Assignments; click on the link once more.

2. In the assignment inbox, click on the title of the assignment to view the submission. The Turnitin Document Viewer will appear in a new window.
3. The Document Viewer is where you can view and grade the submission.

You can also:

a. View the Originality Report

The Originality report highlights the portion(s) of the paper that match repository sources*

*For this demo assignment, the match is 100% because the same paper has been turned in multiple times to the repository for testing purposes.
b. Write feedback directly on the paper using GradeMark

Grademark allows you to write comments on the submission which the student will see when it is returned to them. You can also grade the assignment from this view.

4. If you’ve synced your roster (which we recommend when using Turnitin), the grade that you enter from the Document Viewer will be updated in the Grade Center.

(To sync your roster, go back to the assignment inbox and choose “Roster Sync.” We recommend completing this step when you first create the assignment so that all grades are recorded.)
